DETAILED ACTION

Allowable Subject Matter

Claims 1-6 are allowed.

The following is an examiner's statement of reasons for allowance: The closest prior art known to the Examiner is listed on the PTO 892 and IDS forms of the previous Office action. None of the cited references or combinations thereof disclose or suggest transferring the synthesized moisture together with said more hydrogen into the heat treatment chamber, to form a wet oxidative atmosphere over the first major surface of the wafer inside the chamber, while keeping the moisture in a gaseous state; and performing selective oxidation treatment of a first member over the first major surface of the wafer, in the wet oxidative atmosphere in the heat treatment chamber, by heating the first major surface of the wafer up to a second temperature range not lower than a second temperature higher than the first temperature as required by the presently claimed invention. Moreover, the Terminal Disclaimer filed by Applicants overcomes the obviousness type double patenting rejection of record. Therefore, Claims 1-6 are allowable over the cited prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
